COMMENTS:

I have concerns over this development as I do not think the local infrastructure can cope with the all these additional housing. The current developments are creating good luck around the village. The current strain on the water systems and the gas systems and the utilities in general is becoming untenable for a lot of people across the village now a good example is the pumping stations that I managed never seen by Thames water they are failing and not fit for purpose there by having additional housing putting strain on that utilities would create problems for the existing residence of Crowe thorne. I'd also like to see what are the requirements for additional schooling for families and doctor surgeries as these cannot cope. And I'm also concerned that the fundamental nature of this village and area is being eroded through overdevelopment and the green Spaces are being killed off.
