COMMENTS:

Sir / Madam , I submitted objection on the grounds of noise pollution to the close neighbours of the pumps / air-conditioning units , the visual impact I will now see far more of this neighbours property than currently. Finally the long established "building line" of the lane will be changed and the impact over time if all properties follow suit will take away the countryside feel of the lane. I retain these concerns for the amended designs - I do hope you don't just ignore us like you did previously. The development levels on, close to and next to Church Lane will change the nature of this country village forever - please stop and think about this and listen to the residents - please.
