COMMENTS:

It is important to have a primary school in the area as when we bought the house it was decided that this would be a school and it never got built. There is shortage of primary schools in the area and a primary school doesnt need much of a parking area as most parents will be walking distance. Having a secondary school or sixth form or a play area wont resolve the issue of the traffic flow. So it would better be used for the locals and serve the initial purpose of the planning which was on the site plan to be a primary school.
