Subject: Resubmission of Planning Application due to addition of fenestration varying condition 2 of 240151

We have added a window to the room at the ground floor and the one at the first floor. (North elevation) We found that it is necessary to ensure that the room get some sunlight throughout the day. The original approved plan didn't include any fenestration, and we want to ensure that the changes get notified to the relevant authorities.

Regards

Shashi
