Description of Proposed Works

Please describe the proposed works

The proposal is for the partial conversion of the existing attached garage at the property into a habitable room to be used as a study/utility space. The front elevation of the property, including the existing garage door, will remain unchanged to preserve the external appearance and character of the dwelling.

A new window and door will be added to the rear (garden-facing) wall of the garage to provide light and access to the converted area. These additions will not be visible from the public road and will have no impact on the street scene.

The internal layout will be altered to divide the garage approximately in half, maintaining 3.75m of garage depth for storage/utility use. No changes are proposed to the external footprint or height of the building. The driveway will continue to accommodate two cars, preserving off-street parking provision.
