COMMENTS:

I wish to object to this proposed development for the following reasons:

Traffic and Road Capacity

Old Wokingham Road already experiences significant congestion and delays, particularly at peak times. The existing road network struggles to cope with current traffic levels, and the addition of a large number of new homes will only worsen the situation. I am not convinced that the proposed roundabout will alleviate these issues and believe it could create further delays and bottlenecks.

Loss of Green Space

The development would result in the loss of green space and countryside, permanently changing the character of the area.
