COMMENTS:

The HGV and Artic truck movements already cause traffic difficulties and damage the road surface, road signs and verges. Any increase of such traffic movements cannot be acceptable not least bearing in mind the extra traffic due the SW Development and the proximity of 4 schools. The road surface is already under huge pressure at the Heathlands/Nine Mile Ride traffic lights as the wheels of these trucks drag across the carriageway. The reality is the location of this facility is inappropriate for the truck movements proposed.
