COMMENTS:

I fully support this planning application.

This is a much needed resource. The objections around traffic have it backwards as this would provide local spaces to local people. Parents currently need to drive their children to alternative schools instead of being able to walk or cycle very short distances.

A lack of local spaces for local children deprives the area of a community since children will be forced to go to school away from their place of residence.

Many people will have purchased homes in the new estates with the assumption that this school will be built and will drive young families away from the area.

The estate is not being used as rat run, only by those who live locally as they exit and enter their place of residence. Objections are baseless and a product of NIMBYism.
