COMMENTS:

I have just spent two hours filling in this form and received the following message:

500 - Internal server error !!!

So, my main points were as follows:

- * The whole area is prone to flooding and the Environment agency FRA is outdated and not fit for purpose.

- * The road infrastructure is already over capacity and this development will be a nightmare!

- * The South of Wokingham seems to have a very high percentage of all new housing estates whereas the North has very little. And the new Elizabeth Line, with regular trains to both Heathrow and London, stops at Twyford Station.
