COMMENTS:

I object as this development is proposed in an area unsuitable for this number of dwellings for a number of reasons:-
Flooding is an issue in Swallowfield, and this will make it worse.
The water drainage is already struggling to cope, and with climate change there will be more problems, usually caused by insufficient and crumbling Victorian sewers.
There are insufficient transport services, so the vast majority will have to drive along already clogged rural roads.
The doctors' facility is already over subscribed.

The development does not provide any of the important and desperately needed infrastructure expansion.
