COMMENTS:

I share a garden with the site address, and I am deeply concerned about the proposed rear outbuilding. It appears to be significantly larger or taller than the 2.5 meters mentioned in the planning proposal would it be possible to review this point?

My garden is on a downward slope from the outbuilding's perspective, which was not considered during construction. As a result, anyone inside the outbuilding has an unrestricted view into my garden, which I feel is a serious invasion of our privacy. Unfortunately, I cannot share pictures here to illustrate my point, but it would clearly show the issue.

I believe it should be a social responsibility for the applicant to consult with neighbors and address any concerns. My main request to the committee reviewing this outbuilding is to consider the privacy invasion issue and take necessary actions. I humbly request your urgent attention to this matter.
