Description of Proposed Works

Please describe the proposed works

The application seeks to consent to add to an existing 1.8m timber fence with a sensitively designed, layered, boundary solution. Incorporating a combination of fencing and trellis, with the total sections reaching approximately 2.7m (3 additional feet).

The primary objective is to improve the residential security, privacy and safety for the occupants, given the properties direct interface with the publicly accessible woodland and path which runs roughly parallel to the property side boundary. The council (owners of the woodland) carried out works on the trees between the path and the property in October 2025, to resolve an issue with roots causing subsidence to the application property. The owners of the property are seeking to restore the privacy and protection that the trees previously provided.

Starting from where the side perimeter fence which connects to the rear point of the application owners garage and continuing down to the end point of the side fence at the far end of the rear garden. A trellis topper would be applied, adding approximately 3 feet / 90 cm to the height of the existing 1.8m fence that runs down the side of the property / rear garden.
