COMMENTS:

This is way too much housing in an already over developed area. Just adding more roads to go to the M4 just ruins local areas and congestion the motorway. Overriding all of this is the fact that too many houses have been built with too poor infrastructure to support it. There should be a total and complete moratorium on ANY further development in this area until a new hospital is built to replace and or supplement the old and struggling Royal Berkshire Hospital where you can't even get parked if you need an appointment. Just ridiculous.
