

DATE: 8 December 2025
DESIGNER: Lorraine Calcott IEng FILP MSLL IALD
PROJECT No: 208-01-NAD-LO-D
PROJECT NAME: Scott's Yard, 59 Nine Mile Ride

Wall lights around the perimeter of each property are chosen for their controllability, the ease of dimming, the distribution of light (all downward) and the minimalist style. On key boundaries the lights of plot one are dimmed to only 5% output to keep the hedgerow as protected as possible whilst still lighting to a useable levels for human activities and safety.

Lights for the front doors have some forward throw to aid with facial recognition and safety. Lights are located under the porch area so upward light is not a concern.

Pillar lights to plot four are directed downward and provide wayfinding for entry and exit to the property. Their sideways through is minimal and doesn't provide any light above their mounting height of 0.6m

On site non adoptable lighting
