PLANNING SERVICES — RECEIVED — 08 APR 2002

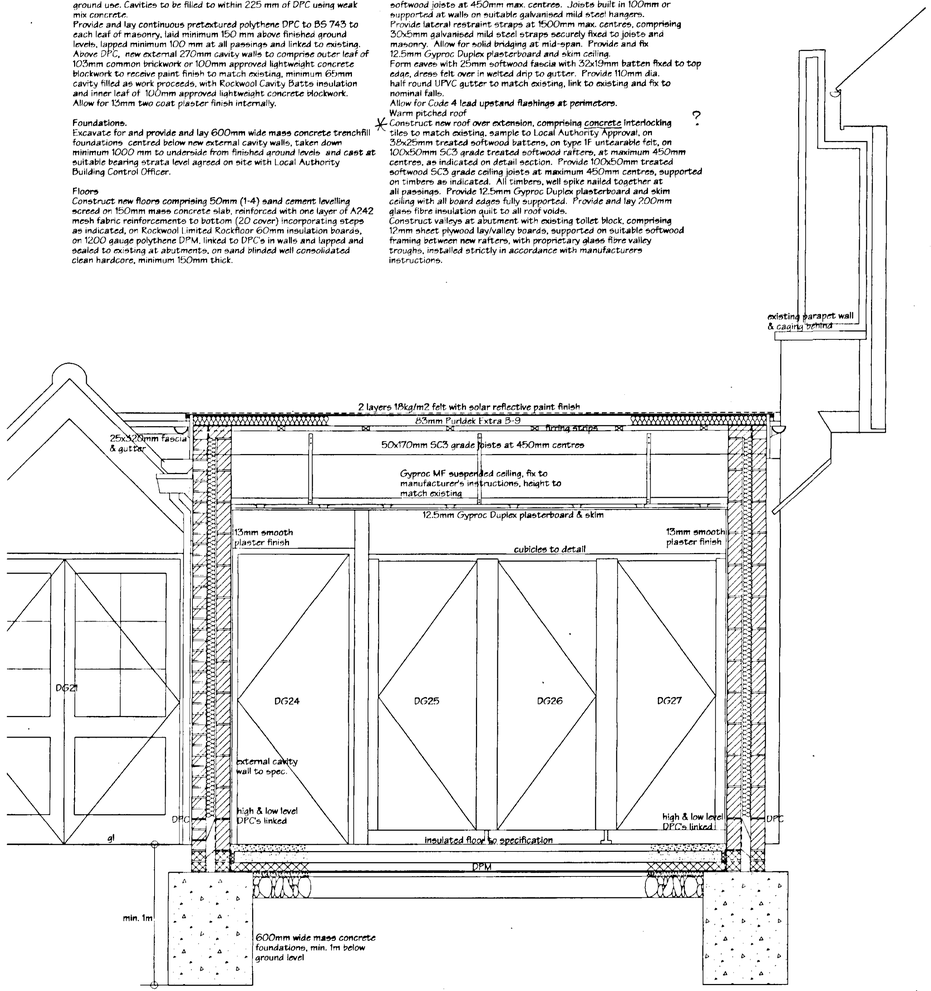

MY 6161/3 B

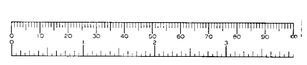

External cavity walls
Below dpc, new walls to comprise outer leaf of Class B semi - engineering brickwork where exposed, remainder in suitable 100mm below ground dense concrete blockwork, with minimum 65mm cavity and inner leaf of 100mm dense concrete blockwork, suitable for below ground use. Cavities to be filled to within 225 mm of DPC using weak mix concrete.
Provide and lay continuous pretextured polythene DPC to BS 743 to each leaf of masonry, laid minimum 150 mm above finished ground levels, lapped minimum 100 mm at all passings and linked to existing. Above DPC, new external 270mm cavity walls to comprise outer leaf of 103mm common brickwork or 100mm approved lightweight concrete blockwork to receive paint finish to match existing, minimum 65mm cavity filled as work proceeds, with Rockwool Cavity Batts insulation and inner leaf of 100mm approved lightweight concrete blockwork. Allow for 13mm two coat plaster finish internally.

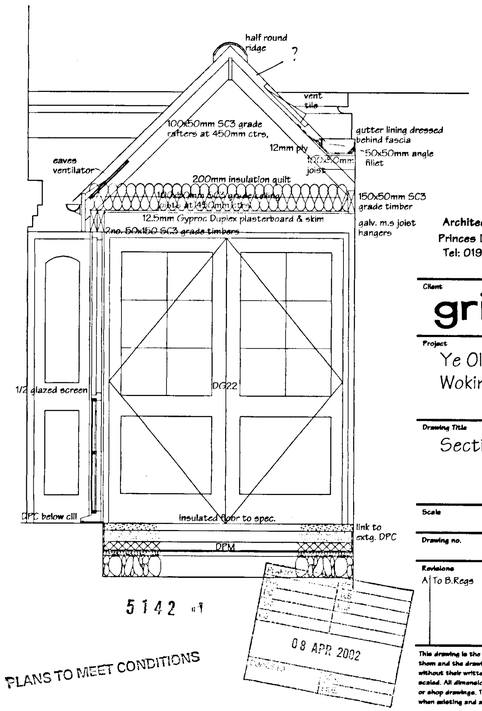

Foundations.
Excavate for and provide and lay 600mm wide mass concrete trenchfill foundations centred below new external cavity walls, taken down minimum 1000 mm to underside from finished ground levels, and cast at suitable bearing strata level agreed on site with Local Authority Building Control Officer.

Floors
Construct new floors comprising 50mm (1-4) sand cement levelling screed on 150mm mass concrete slab, reinforced with one layer of A242 mesh fabric reinforcements to bottom (20 cover) incorporating steps as indicated, on Rockwool Limited Rockfloor 60mm insulation boards, on 1200 gauge polythene DPM, linked to DPC's in walls and lapped and sealed to existing at abutments, on sand blinded well consolidated clean hardcore, minimum 150mm thick.

Roofs
Warm Flat Roof
Construct warm flat roof comprising three layers 18kg/m2 felt, hot bonded to 85mm Furldeck Extra B-9 combined insulation roof board on 50mm wide softwood firrings to falls 1 in 40, on 170x50mm SC3 treated softwood joists at 450mm max. centres. Joists built in 100mm or supported at walls on suitable galvanised mild steel hangers.
Provide lateral restraint straps at 1500mm max. centres, comprising 30x8mm galvanised mild steel straps securely fixed to joists and masonry. Allow for solid bridging at mid-span. Provide and fix 12.5mm Gyproc Duplex plasterboard and skim ceiling.
Form eaves with 25mm softwood fascia with 32x19mm batten fixed to top edge, dress felt over in welted drip to gutter. Provide 110mm dia. half round UPVC gutter to match existing, link to existing and fix to nominal falls.
Allow for Code 4 lead upstand flashings at perimeters.
Warm pitched roof
Construct new roof over extension, comprising concrete interlocking tiles to match existing, sample to Local Authority Approval, on 38x25mm treated softwood battens, on type 1F untearable felt, on 100x50mm SC3 grade treated softwood rafters, at maximum 450mm centres, as indicated on detail section. Provide 100x50mm treated softwood SC3 grade ceiling joists at maximum 450mm centres, supported on timbers as indicated. All timbers, well spike nailed together at all passings. Provide 12.5mm Gyproc Duplex plasterboard and skim ceiling with all board edges fully supported. Provide and lay 200mm glass fibre insulation quilt to all roof voids.
Construct valleys at abutment with existing toilet block, comprising 12mm sheet plywood lay/valley boards, supported on suitable softwood framing between new rafters, with proprietary glass fibre valley troughs, installed strictly in accordance with manufacturers instructions.
