COMMENTS:

We strongly oppose the proposed relief road and the subsequent dual carriageway that would connect to Lower Earley Way. This development would have a significant negative impact on the homeowners in Barn Croft Drive.

The proposal disregards the needs of the local community, and we believe it will result in a significant reduction in both safety and quality of life for residents. The risks associated with increased traffic, noise, pollution, and the overall disruption to the area's character cannot be overstated. We urge the authorities to reconsider this plan in light of its potential to negatively affect the people who live and work in this community.
