

Tree No.	Species	Age Class	Height (m)	Trunk Dia. (mm)	Phys. Cond.	Observations	FS	TS	IS	Hazard Rating	Threat Score	Urgency Code
1	Ash	Mature	15	300	Poor	Dieback throughout crown; lower than average vigor; tree in decline. Recommendation: Fell tree	0.8	25	10	200	Slight	A
2	Oak	Mature	20	900	Fair	Dead limb overhangs road at 8m from ground level. Recommendation: Remove deadwood over road failure in the future. Target of grave sites.	8	20	4	640	Moderate	13W
3	Yew	Mature	15	1100	Fair	Extensive stem cavity, steel belt brace in place. Potential for full tree failure in the future. Target of grave sites. Recommendation: Restrict access under tree. Decision lies with the landowner to determine the value of the tree verses the grave sites, and if the loss of amenity value of the tree removal outweighs the potential damage to the graves. Extensive deadwood, up to 200mm diameter over footpath and bench area. Recommendation: Remove dead limbs	2	15	10	300	Slight	A
4	Oak	Mature	18	1100	Fair	Extensive stem decay with Ganoderma fruiting body present inside, potential decay column from base to 3m. Recommendation: Fell tree	0.8	20	10	160	Slight	A
5	Beech	Mature	20	600	Fair	Sounding hammer suggests internal stem decay at base; dieback throughout upper crown. Recommendation: Fell tree	0.8	15	10	120	Minimal	3Y
6	Robinia	Mature	16	300	Fair	Extensive stem hollowing at major union; internal decay. Recommendation: Fell tree	2	15	10	300	Slight	A
7	Robinia	Mature	16	350 300	Fair	Dead tree. Recommendation: Fell tree	8	15	10	1200	Significant	4W
8	Robinia	Mature	16	300		Dead tree. Recommendation: Fell tree	2	15	10	300	Slight	A
9	Unknown	Dead	10	200	Dead	Deadwood in excess of 50mm over footpath. Recommendation: Remove deadwood over footpath	2	15	4	120	Minimal	3Y
10	Hazel	Semi Mature	10	100	Fair	Dead tree. Recommendation: Fell tree	2	15	6	180	Slight	A
11	Unknown	Dead	10	140	Dead
