COMMENTS:

On behalf of the local wildlife, the preservation of important remaining green spaces, the maintaining of hugely important flood plains, the sanity of the surrounding residents who already have too much traffic to deal with on inadequate roads, No thanks!!!!!!

Absolutely not!! Look up as I've done how many hundreds of thousands of empty unoccupied homes there are across England & start to fill them instead! Necessary public services & amenities will of course already be there in place for people who move into the countless unoccupied homes, IE should you, the lazy money grabbing planning developers choose to adopt this approach across the country instead?

We can not keep concreting over the whole of the South East of England. A very unhappy Lower Earley resident who will oppose this crazy scheme every step of the way. ???????Pete Turner

Enough is enough, how & where do I go to protest against this happening?
