COMMENTS:

I object whole heartedly on the application of speedy fuel to operate in charvil.

1 this backs on to a nature reserve where lots of nest in of wild life is also the nature reserve is prone to flooding .the old bath road is not a place that is geared up for lots of heavy lorry's the visibility is dangerous the entrance is on a bend this is a accident waiting to happen .  
There is no way this type of operation should be allowed to be based so close to a village and wildlife
