COMMENTS:

I object to this application .i though when CHARVIL was made into a nature reserve this meant the animals and wild life would be protected with the fumes.noise and heavy traffic this will not be the case . The risk of contamination to the river and the lakes is very high.

The risk of accidents due to entrance being on a bend and lorry's will need to come out onto both carriageways.

The list of things that can go wrong with this site is not low risk there all high risk,contamination,explosions,fire,accident,safety to residence,safety to wild life
