COMMENTS:

If this is a scoping opinion then why does it say consultation closes on the 10 January 2025 seems very weird or is that a way for the University to get its plans agreed and not take into consideration those living and know the area. The majority of the area is a FLOOD plain, I see it shows the 30 year etc floods expected, I have lived in Lower Earley for over 30 years and there has been many more than just 1 flooding incident. As for the proposed infrastructure, Lower Earley Way struggles with the traffic now this will just more chaos. Does nobody actually care about us Tax Payers?
