COMMENTS:

I am a resident living nearby and strongly object to the removal of restricted delivery times for the new development. Traffic around this area is already very heavy during the day and is noisy, polluting and potentially damaging to structures. Our house shakes when hgv's drive past and we have cracks on walls and ceilings appearing all over our property. During the summer when windows are open you can barely hear anything over the noise of the traffic on Spitfire Way. We do not need this at night and weekends as well when we already put up with loud boy racers and motor bikes. Would make more sense to put up a speed camera and reduce traffic rather than try to increase it.
