COMMENTS:

Strongly object to the Loddon Valley Garden Village development, which would not only put a huge burden on the already strained infrastructure in the area, it would also create more air and noise pollution, but most importantly, it would destroy a huge chunk of the countryside.

The proposed plans do not address any of these concerns as the impact of the new infrastructure and green areas described in the application pale in comparison to what the decimation of the countryside will lead to: net result of making the whole area unliveable.
