COMMENTS:

As a disabled resident of Twyford, I regularly use community transport to travel to Reading and regularly pass the proposed site. The road service is already v v poor just by the site entrance, something that will be worsened by the proposed increase of heavy vehicles

transporting goods to & from the site. Coupled with the increase in traffic locally, the negative environmental & health impacts to the surrounding green spaces, lakes, streams and waterways (including the wildlife population)and the local population, many if whom are elderly and live in v close proximity to the proposed development. Along with the potential risks and dangers associated with the storage of flammable volatile liquids, I object very strongly to this application.
