COMMENTS:

I object to planning application 252782 for the following reasons:
There are huge environmental risks of pollution entering into the
loddon and nature reserve from oil spills causes by flooding or
human error. they are proposing to pump treated sewage and ground
water into the old loddon. with this comes fuel, oil, detergents
to name but a few. This could be catastrophic for the fish and
wildlife. The

biodiversity net gain proposals dont go anywhere near far enough.
Im concerned about the huge number of lorry movements each day and
what control if any there will be on this. This will impact
residents from early in the morning and other road users. The
access to the site is not safe . This is NOT a suitable site for a
fuel depot.
