COMMENTS:

Objection to Planning Application: Proposed Fuel Depot, Old
I'm writing to strongly object to this planning application.
Building a fuel depot storing over 837,000 litres of hazardous fuel
oil right next to our village, homes, schools, and the River Loddon
nature reserve is unsafe and completely unsuitable.
Safety risks: The plan would create 132 vehicle movements per
weekday, including 59 heavy lorries, on a narrow road used by
children,
walkers, and local residents. The potential for accidents is very
high.
Environmental impact: The site is prone to flooding and unstable.
Any fuel leaks or runoff could seriously harm the river, nearby
lakes, and wildlife that we all care about.
Industrial scale in a village: 711 tonnes of fuel is far too large
for a residential area. A few trees and shrubs do not make up for
the danger.
Community impact: Twyford and Charvil are residential villages, not
industrial zones. This development would permanently change the area
and threaten the wellbeing of residents.
This proposal is unsafe, harmful to the environment, and out of
place in our community. I urge Wokingham Borough Council to reject
this application and protect our village and local nature.
