COMMENTS:

Apart from the obvious environmental concerns about having this quantity of fuel to close to a nature reserve - potential leakages, impact on quality of air and the amazing wildlife we are lucky to have here - I have concerns about traffic and the road.

This is a popular walking path with footpaths surrounding the estate and a very thin pavement from Twyford-Charvil. You can't even pass another pedestrian safely let alone have increased lorry activity. This road is already dangerous with speeding and overtaking but large lorries heading through the village is an accident waiting to happen. I strongly object to this proposal.
