KEY

PLANTING STRATEGY

(1) Existing vegetation.

(2) Woodland edges / natural colonisation of heathland and acid grassland. Locally indigenous tree planting and understoreys.

Tree planting would include :
Betula pendula
Crataegus monogyna
Sorbus aucuparia

Understorey planting would include:
Cytisus scoparius
Rosa canina
Rubus fruticosa
Sambucus nigra
Ulex europeaus

(3) Creation of new habitat with locally indiginous broadleaf tree planting and understorey.

Tree planting would include:
Betula pendula
Pinus sylvestris
Quercus robur
Sorbus aucuparia

Understorey planting would include:
Calluna vulgaris
Erica tetralix
Ulex minor
Vaccinium myrtillus

(4) Proposed formal planting associated with entrances and areas close to the proposed buildings.

(5) Indigenous broadleaf planting associated with damp and marshy areas around proposed balancing facility.

Plants would include:
Salix caprea
Salix cinerea
Phragmites australis (within the pond area itself)
