

The standard domestic **Vaillant 60/100mm concentric vertical flue kit (Part No. 20223472)** has fixed dimensions essential for sizing clearances above the roofline and planning internal pipe runs. [AIZO Quality Heating +2](#)

Core Physical Dimensions

- **Total Assembly Length: 993 mm** (approx. 1 metre) from the top terminal cap to the base connection.
- **Outer Pipe Diameter: 100 mm** (houses the air intake channel).
- **Inner Pipe Diameter: 60 mm** (houses the central exhaust duct).
- **Visible Height Above Roof:** Typically ranges between **400 mm and 500 mm**, depending on how far down you slide the weather flashing plate along the terminal shaft during installation. [City Plumbing +3](#)
