COMMENTS:

I fully support this application. I am also baffled as to why it's even necessary when a previous vendor already had planning permission granted in April of this year? The wagon is in the exact same place and plans to operate in exactly the same way, it also mirrors other wagons in the area including in the nearby Market Place which the council allows to be there daily. Surely this should be classed as permitted development as a result? Seems a waste of council time and a small businesses money to make them do exactly the same as a wagon earlier in the year?
