COMMENTS:

Hyde End Rd is already over run with traffic from the other 2 huge estates that have been built. The road is too narrow and accidents have occurred recently caused by speed/vehicle size/road conditions. Before any more building work takes place, the road needs widening and upgrading.

The area does not need any more houses. What was once a quiet rural village is now becoming far too built up, erasing the lovely countryside feel and the green spaces residents hold dear. Before building more houses, please look at the local infrastructure - there is one dentist, one doctor surgery - both of which are almost impossible to get appointments at as they are massively over subscribed with patients. The same goes for schools.
