COMMENTS:

I object to this application for environmental reasons: the danger of fuel spills going into the river and the danger of pollution. I have noted the proposers comments on their safety procedures but human error and mishandling would have a devastating effect on the river and lakes. My other concern is the huge number of Lorrie's and large vehicles using the route to the A 4. From early in the morning till late. This will cause disruption for local residents and congestion for through traffic. This is such a fragile environment and there seems little consideration for residents and aquatic wildlife.
