

Application 243125 - Thamesfield Retirement Village, Remenham, RG9 2LX

Thank you for consulting us regarding the revised plans in relation to the above application.

We acknowledge and welcome the revisions to the scheme in relation to a reduction in the massing of the roof area of the development and the more traditional design approach. However, our concerns largely remain in relation to the development being disproportionate in scale, height and massing to the existing building and we remain concerned about the development being visually prominent from the river and the sensitive riverside edge of Henley to the detriment of the setting of the Henley Conservation Area.

Kind regards,

Tom Wyatt
