

Parking Provision Statement

Site Address: Hennerton House, Wargrave, Wokingham, RG10 8PD

The proposed works involve the replacement of two 14-year-old collapsing and dangerous domestic outbuildings with a smaller outbuilding within the side garden of the property.

The proposal does not alter the access arrangements to the site and does not remove or affect any existing parking spaces. There will be no increase of traffic on the nearby fairly isolated road.

There will be no increase in residential occupancy or change in the use of the property. These sheds/outbuildings were for gardener's use and storage; their function will remain the same.

Existing parking provision therefore remains unchanged and is more than adequate for the residential use of the property.
