COMMENTS:

The value of a burial ground often extends far beyond its primary purpose. I am supporting this plan for the following reasons:
Burial grounds frequently serve as protected green areas that help mitigate the effects of climate change, and serve as a refuge for animals. It will strengthen community identity and offer a place for grieving, remembering, healing and shared history. The community will benefit mentally since it will become a calm and contemplative area, which promotes mental health. Additionally, it will make green space accessible, which lowers stress levels
