

Condition 51: Water Butts

The reserved matters for each phase of the development shall include provision for all dwellings within the phase with a garden with:

- a. A water butt of an appropriate size installed to maximise rainwater collection; and*
- b. Space for composting*

BDW can confirm that all dwellings with private gardens will be provided with composting areas. These areas are expected to be located within the corner of the garden but the final decision will be left for the purchaser to decide.
