COMMENTS:

1. A 4 metre extension will severely affect the natural daylight I currently have in my living area and garden. It is more than my conservatory and more than the discrete extension built at No. 10.
2. The houses in this row of 4 houses are all of light brick and concrete roof tiles so the proposal of red brick and red tiles does not fit at all.
3. A more fitting extension would be 3 metres.
4. I cannot see the height of the extension on the plans. What is it? 3 metres maximum would be suitable.
5. What would the access for the builders be when building so close to my house as the next door house?
