COMMENTS:

I on behalf of my family and friends (the baa baas) wish to object most strongly to the development of Barkham Square which has been our homeland for many generations. We have shared this land with the gee gees and the moo moos with whom we have always got on. Langley Common Farm (now Langley Common House) was the centre for the farming activities and sometimes shelter against harsh winter conditions plus storage for the hay in the years the land was left as fallow. This is and still is prime farmland and we might only be sheep, but we have grazed here and bought up our little lambies (most of whom leave home once grown up but many stay to bring up the next generation), and should have rights and not be dismissed by a bunch of planners who have no interest in the countryside just profit. We appeal to the council to take our views seriously and not just pander to meeting government requirements and know we have the backing of many of our human friends. (we do like to keep them awake at night sometimes by bleating a lot....what fun!!). SAVE OUR FIELDS xx Baabaara
