COMMENTS:

This application still does not address the issues with access from Old Forest Road. This is a rural lane without pavements and streetlights suitable for such a development and I see no plans to change that. I have concerns about the width of the access road - which would also need pavements.

CP20 refers to the Local Plan and any such application is supposed to have access from the link road.

Please look at previous applications and it is clear that there are concerns that have not been addressed.
