COMMENTS:

This application does not address all remaining issues with the property. The site and location plans are inaccurate and fail to show the kennels/store that was positioned next to the ancient woodland. Retrospective permission for this structure with its concrete base was refused as part of application 213435. Application 223194 granted permission for this structure but in a different location further away from the ancient woodland, the structure has not been relocated nor has the concrete base been removed.
