COMMENTS:

The area is already saturated with new build houses.
There are not enough primary school places available for more families to live in the area. The local secondary school has been lacking funding and support.
There are a lack of places at the local doctors surgery and local dentists.
The road network in the area can not cope with the current traffic levels.
So how do they propose to support the local infrastructure? These things need to be sorted before anyone breaks ground on building more homes!
