

Wargrave Tennis Club Planning Permission for a Single Temporary Padel Court

Wargrave Tennis Club would like to install a temporary single padel court from April 2025 for the benefits of our members. We are proposing that we install a single “pop-up” court that requires no foundations. The court would be installed on the northern end of court number 8 (the court in the south-east corner and furthest from any residential dwelling). The court would have low-level LED lighting that is below the existing court lights i.e. would have even less glare.

Padel is an incredibly popular short-court tennis format played on a smaller court with see-thru plastic walls – it’s a hybrid of tennis meets squash. In a recent survey, 70% of members were supportive of the idea.

1 x Super Panoramic Pop-up Court

Wargrave LTC, Recreation Road, Wargrave, Reading RG10 8BG

Left | Tennis Court 8 provides an excellent site for a pop-up padel court and it is proposed to locate it at the northern end with a 2m gap between the fence and the start of the padel court, centred on the tennis lines. This will leave approx. 3.5m each side as the tennis court is only 17m wide.

There will be space at the southern end to keep the Rebound Wall which will be set up as a separate court on the booking system.

The electrical feed for the padel court can be sourced from the existing masts and we ask that a local electrician arrange the cabling prior to our arrival on site. Padel Plus will advise where the cables need to run on the ground and our installation team will make the final connection within the court frame.

This represents a significant saving in groundworks compared with installing reinforced concrete ring beams.

Location Plan

Site map of Wargrave Tennis Club showing the location of the single pop-up court on existing tennis court 8. Approximately 20x13 meters.
