COMMENTS:

This planned development is not in the local development plan which was only recently adopted. An additional 40 houses is unsustainable to the site and area. There is insufficient infrastructure in the surrounding villages and vehicle transport is an absolute necessity adding to increased pollution and issues of traffic management which the local roads already can not manage.

The green spaces in and around Finchampstead and Eversley are essential to the rural nature of the villages and key for allowing wildlife's natural habitat. Opposite this site is a nature reserve. Additional housing buffering this site will have a detrimental effect on the wildlife. I whole heartedly object to this application
