COMMENTS:

I object to the planning application for the building of 40 houses. Environmental grounds. This is a beautiful site which supports habitat for many species of bat, reptiles, small mammals and birds. It is a sight of natural beauty. The addition of green space/park on the site is a tick box exercise. Habitat will be disrupted and there will be LESS OF IT because of the building.

Infra-structure. Local GP surgeries are too busy already due to large scale building in areas like Arborfield green. The roads are already busy. There is no local shop or post office and local transport is not good. The village will become like so many others - devoid of character.
