COMMENTS:

The site is unsustainable. This is a rural, not urban area. There is no public transport within easy reach of the location. This means all new residents will be using vehicles, which will increase traffic, increase pollution and more importantly add to the already dangerous road conditions in the area. The pavements are very narrow, with cars frequently / habitually exceeding the speed limits. We frequently walk to reach Crowthorne or even Wokingham, which requires walking along the country lanes with no pavement at all. This already results in aggressive behaviour from vehicles impatient to get past. Increasing levels of traffic will make this situation worse still. Urban expansion in what is effectively a rural area is not sustainable.
