COMMENTS:

As a resident nearby of the proposed site, with line of sight of Viscount Way directly from my house, I am already impacted by the noise and vibrations coming from transiting vehicles to the site. I would like to object to the removal of planning condition 32. The noise is already at a level that it creates a disturbance to the health and quality of my life. However removal and extension of the noise into nighttime hours will have an even greater impact through disruption of sleep.
