COMMENTS:

Very worried about this application for development. This appears to be a very unsuitable site with limited access and i assume no drainage or sewerage and the change will likely be harmful to the woodland and surrounding area. The access to the area is not suitable for traffic and has already markedly impacted (partially destroyed) the trail road into the area. There was never a plan to develop this area in any local plans so it seems completely outside the development strategy, which has already seen a huge amount of developments in the local area. A final personal note, my wife and son were chased by dogs (behind a low fence) whilst walking through this previously calm and natural area and as local residents are very concerned at the unsustainable nature and potentially damaging impact of this application.
