COMMENTS:

We could object to this application for so many reasons, but above all we are hoping someone will see sense and stop any further development on and around Islandstone Lane because of the flooding.

The road floods regularly and since we've been living here the number of flooding occurrences and the severity of the flooding has increased year-on-year. It has already been underwater since the summer. The water was higher than I have ever seen it last spring, coming all the way up to within a few yards from our garden wall.

If more land in this vicinity is allowed to be built on, which is a natural soak away, it doesn't take a flood risk assessment expert to work out the water will rise higher during periods of flooding, putting existing homes at risk.`
