Dear Collette,

Thank you for visiting my home at **4 Bigshotte Court** on 11th June 2026 and for clarifying the scope of the new TPO.

During your site visit, you did indicate you were agreeable to a professional tree surgeon removing certain spindles and branches that are leaning towards the house.

For the avoidance of doubt I would like to formally record what I plan to remove, as discussed and agreed.

Removals - I will only remove those spindles /branches outlined in the images below

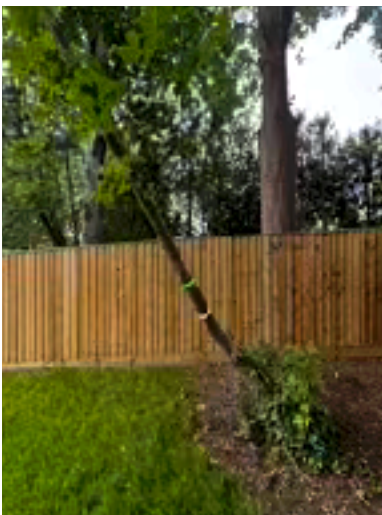

Exhibit A - Single, poor quality spindle.

This spindle is NOT listed on the TPO

Exhibit B - A lime tree excluded from the TPO.

PERVEN MAAN

Exhibit C - This is the tree that leans the most towards the house. It is nestled in a cluster but you did agree it could come out and I will leave everything else as is.

Trimming/Height Reduction - I have a cluster of 3 trees where I would like to reduce the height, as Derek has already done next door. This would greatly increase the light inside the house, and on the patio, while the trees would remain intact. A 2m height reduction as discussed.

These are the trees in the cluster...

I would be grateful if you could provide written confirmation, either by email or letter, that I may proceed with the removal of the spindles/branches highlighted in exhibit A-C.

In addition, I intended to submit an application via the planning portal to reduce the height of the three trees outlined. Unfortunately, I have found Wokingham Council website somewhat difficult to navigate. I would therefore appreciate if you could email me the relevant portal link.

I look forward to your response.

Thank you for your care and attention in this matter.
