COMMENTS:

Having read the objection all ready submitted I support the comments made. Major concerns are the location and the impact of the development on the surrounding areas. I am concerned about the environment and

support comments made about flooding and water treatment. One of my major concerns is that 2800 houses will see the prospect of over 5000 private vehicles accessing the road network. if there are not major changes the roads for access to the M4 or Reading the delays and traffic jams we experience today will escalate.
